

HKIX3b Now Live at MEGA-i

The Most Connected Data Centre in Hong Kong

Enhanced Network Performance with Two HKIX Satellite Sites on MEGA Campus

HKIX3b is the latest addition to the Hong Kong Internet eXchange (HKIX) satellite site in town directly connecting to MEGA-i, the most connected data centre in Hong Kong. Since most HKIX participants have PoPs in MEGA-i, they can now exchange traffic within MEGA-i locally and enjoy enhanced network performance.

With HKIX3b, MEGA Campus is the data centre campus in Hong Kong which houses 2 HKIX satellite sites. Along with HKIX3 at MEGA Two in Shatin enjoying proximity to HKIX's core sites HKIX1 and HKIX1b on CUHK campus, the addition of HKIX3b at MEGA-i creates unparalleled secured connections to HKIX with extra redundancy and flexibility.

Reduced Hop-Count

Eliminated Local Loops

Shorter Latency

Full Resilience

Enhanced Performance

Lower Cost

For enquiries about HKIX satellite sites on MEGA Campus, please contact general-hkix@iadvantage.net.

HKIX and Satellite Sites

HKIX is one of the largest Internet Exchange points in Asia Pacific. Operated by HKIX Limited, a wholly-owned subsidiary of the Chinese University of Hong Kong (CUHK) Foundation, the aim of HKIX is to connect Internet Service Providers (ISPs) in Hong Kong so that intra-Hong Kong traffic can be exchanged locally without any overseas routing.

The establishment of satellite sites in town is a strategic move on the part of HKIX to enhance proximity for local Internet users. By co-locating data centres and satellite sites, HKIX users can enjoy direct connection with enhanced performance and greater flexibility at lower cost.

SUNeVision and MEGA Campus

SUNeVision (SEHK: 1686), the technology arm of Sun Hung Kai Properties (SEHK: 0016), is the largest data centre provider in Hong Kong. We provide industry-leading carrier and cloud-neutral data centre services with global top 10 connectivity. We connect providers of telecommunications, cloud, ISP, CDN, OTT from local, the mainland and global with enterprises of different businesses on our Asia leading data centre ecosystem.

SUNeVision forms MEGA Campus by extending the connectivity edge from highly connected MEGA-i to other high-tier data centres, including MEGA Two and MEGA Plus. Facilities on MEGA Campus are interconnected through high-performance dedicated fibres and around 15,000 cross-connects. Together with City PoPs of major submarine cables in our facilities, we enable our customers for direct connections to multi-cloud platforms and multi-cloud exchanges with the best connectivity in town. We are committed to supporting Hong Kong as a regional information hub and a strategic gateway to the mainland.
